

CRESCENTA VALLEY WATER DISTRICT

FY 2011-12 Water Main Replacement Projects

Crescenta Valley Water District (CVWD) will be replacing 1,975 feet of water pipelines as part of CVWD's FY 11/12 Capital Improvement Projects.

CVWD will be replacing about 850 feet of old 4-inch water main on the 2300 block of Chapman Road with a new 8-inch diameter water main. The existing water main was installed between 1946 and 1956.

CVWD will be replacing about 1,125 feet of old 6-inch water main on the 3800, 3900 and 4000 blocks of Cloud Avenue with a new 8-inch diameter water main. The existing water main was installed between 1946 and 1957.

Both existing pipelines have developed numerous leaks and in the interest of public safety and since the pipelines have deteriorated beyond their useful life; the District will be replacing these pipelines as part of CVWD's ongoing pipeline replacement program.

For exact location, see the project location maps attached.

CVWD has awarded a construction contract to Brkich Construction of Monrovia to install the new pipelines. The existing pipelines will be abandoned and left buried in the ground.

CONSTRUCTION SCHEDULE:

- 2300 block of Chapman Road
 - September 19, 2011 – Begin construction
 - October 28, 2011 – Estimated end of construction
- 3800, 3900 and 4000 blocks of Cloud Avenue
 - October 31, 2011 – Anticipated start of construction
 - December 9, 2011 – Anticipated end of construction

CVWD will issue an updated the construction schedule via this website to better inform the residents of the construction activities.

As in most construction projects, this work will create a certain amount of unavoidable public inconvenience.

Two issues that the public needs to know about during construction:

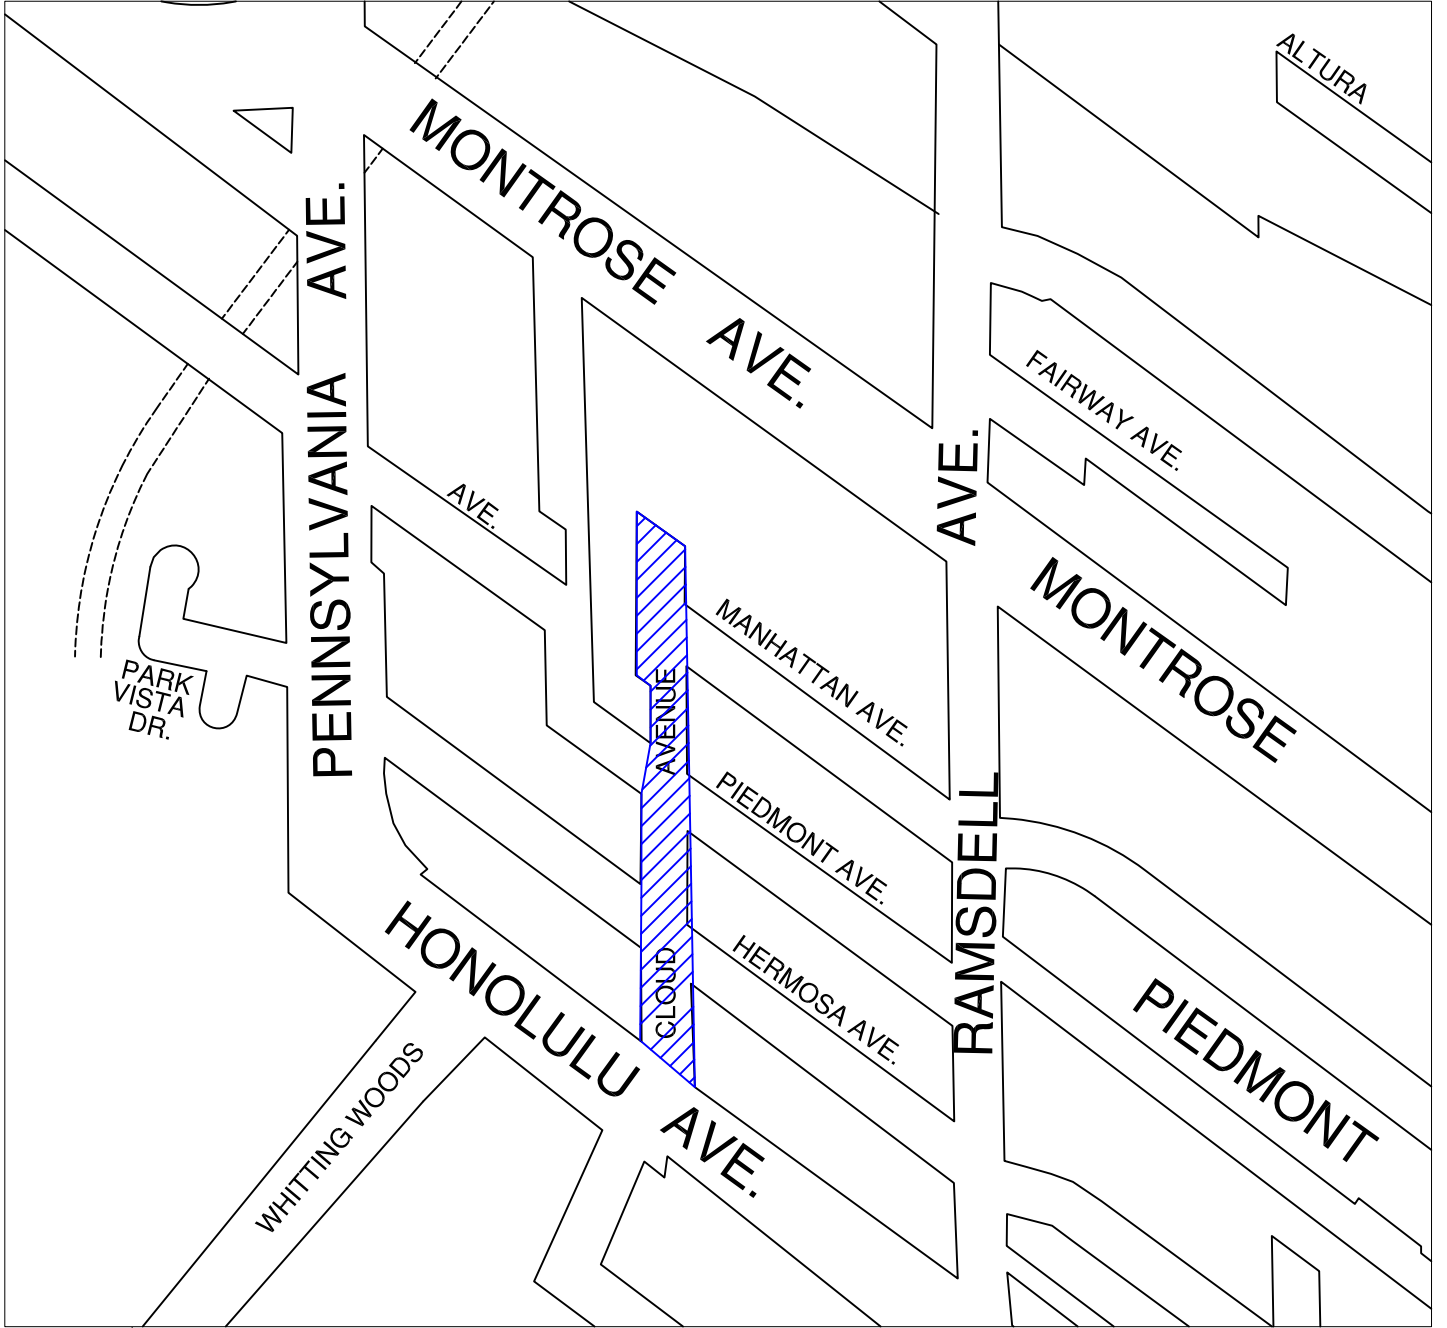

1. There will be a period of time, usually between 6 to 8 hours, when the water service to your home will be shut down. This will occur when the contractor ties the new water main into the existing water main. The District will send another letter regarding the contractor's construction schedule and the anticipated shutdown date. In addition, CVWD will notify each resident, a minimum of 48 hours before the actual shutdown, with a door hanger that indicates the date and time of the shutdown.
2. The contractor will be installing temporary parking and traffic restrictions along Chapman Road and Cloud Avenue. This will allow the contractor's crew to work in a safe and expeditious manner to complete the project. "Temporary No Parking" signs will be posted a minimum of two (2) days before construction. The District asks that you observe these signs and any other traffic control. Driveways within the construction zone may be temporarily restricted due to the construction. CVWD's on-site inspector and the contractor will assist you with access into and out of your driveway.

Your cooperation in making this project successful will be greatly appreciated. Additional information will be updated periodically on CVWD's website.

If you have any questions or comments concerning this project, please contact:

Christina Olmedo, Project Manager - Phone (818) 236-4115 or e-mail - colmedo@cvwd.com

Julian Lee, P.E., CIP Manager Phone (818) 284-5814 or e-mail -jlee@cvwd.com
